

SUSTAINABILITY REPORTING USING SAP BI

Are you ready for the mandatory National Greenhouse and Energy Reporting (NGER)?
Do you know that our solution can help you meet your NGER reporting needs?

The Challenge

- Effective 1 July 2008, 700 large and medium size Australian businesses are required to report under the NGER act.
- This will also form the basis for the future Australian Emissions Trading Scheme (AETS).
- Timely, auditable, and accurate reporting is required.

The Benefits

Our proven solution approach will:

- Provide a comprehensive approach to meet these challenges
- Leverage existing SAP landscape
- Manage both SAP and non-SAP data
- Allow the rapid deployment with minimal business disruption
- Complement other emissions management systems.
